

**PRODUCT GUIDE 2014**

# WELCOME

After a whirlwind year I am very happy to say that things are looking very good for JDH. The growth of the brand has exceeded my expectations and JDH is now being sold in over 12 countries! We have been getting great feedback and I am extremely happy with the quality of the sticks at the moment.

To accommodate our growth we are going to add more stick moulds which is very exciting from my point of view. Next years range will be awesome and I am excited to introduce the TPX 795 which is a stick specifically designed for my game. You will be able to read more about it in the catalogue. I have been testing the stick in the last few months and I can honestly say its the best stick I have ever used. Best hitting power with a great "soft feel" for trapping and skills as well. I'm obviously excited to add it to our 2014 range. We are also adding some new products to our range, which are JDH shin pads (for junior and senior players), JDH grips and JDH mini sticks.

# TEAM JDH

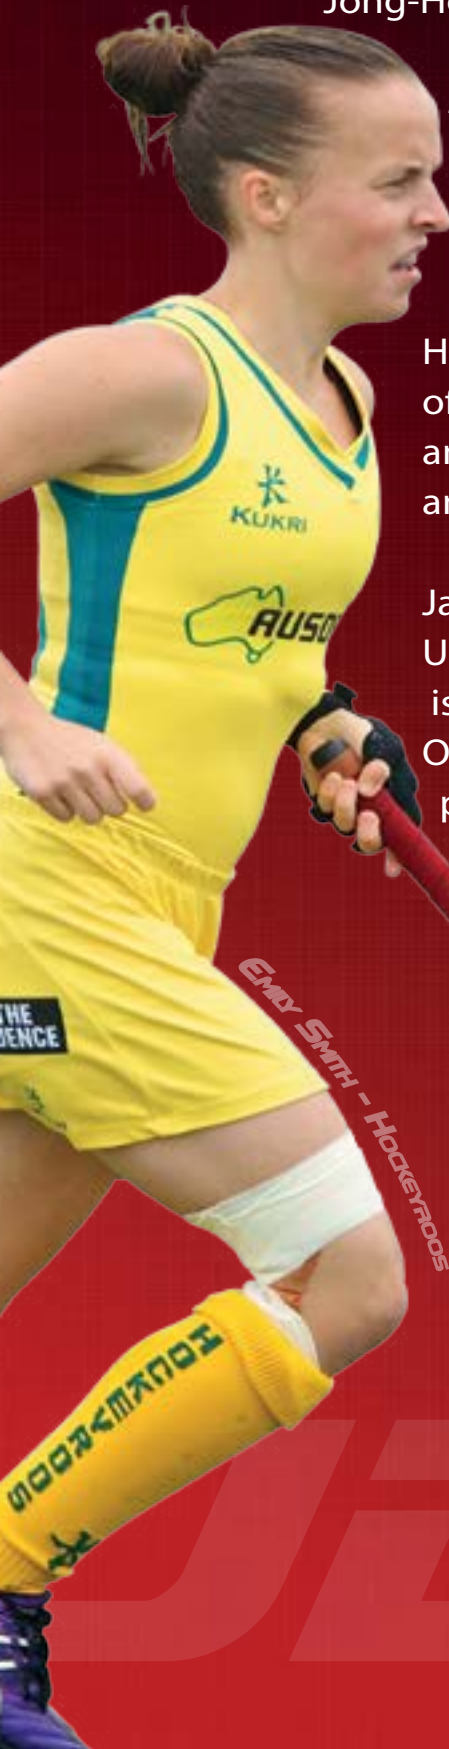

I am also proud to have expanded the JDH team with the following players: Jong-Ho Seo, Emily Smith, Jayshaan Randhawa and Blake Govers.

Jong-Ho Seo is a four time Olympian and Olympic silver medallist who has also been nominated for the prestigious FIH world player of the year award. Its an honor to have him playing with a JDH stick!

Hockeyroos young gun Emily Smith was the youngest member of the Australian 2012 Olympic team at only 19. She is a quick and very skillful forward that has a great ability to score goals and will be in the Hockeyroos team for many years to come.

Jayshaan is a midfielder who currently plays for the Burras (Australian U21 team) and has been selected to go to the Junior World Cup which is in India in December. His big dream is to play in the Rio de Janeiro Olympics in 2016. His first international tournament for Australia was playing in the inaugural Youth Olympics in Singapore in 2010 and Jayshaan is the proud winner of the champions medal as Australia won the hockey gold.

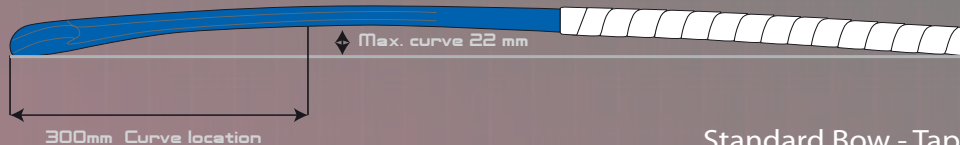

Blake is the youngest member of the team. Blake is an up and coming player that has a very powerful drag-flick and is also a skillful forward. He is currently in the Burras squad (U21's Australian team) and lives in Wollongong where he trains. His dream is to make it into the Kookaburras squad one day to join his big brother Kieran.

# TPX 795

SB

LB

XLB

New to the range in 2014 the TPX795 is our most innovative and technological advanced stick to ever hit the market.

Featuring the exclusive Taper Toe design for more control on fore-stick drags, better precision on push outs, faster on the spot spins and overall better ball control.

It features a gel underlay through the handle which enables us to make a very stiff & powerful stick without sacrificing the soft touch feel and to reduce any unwanted vibration.

# TAPER TOE OVERVIEW

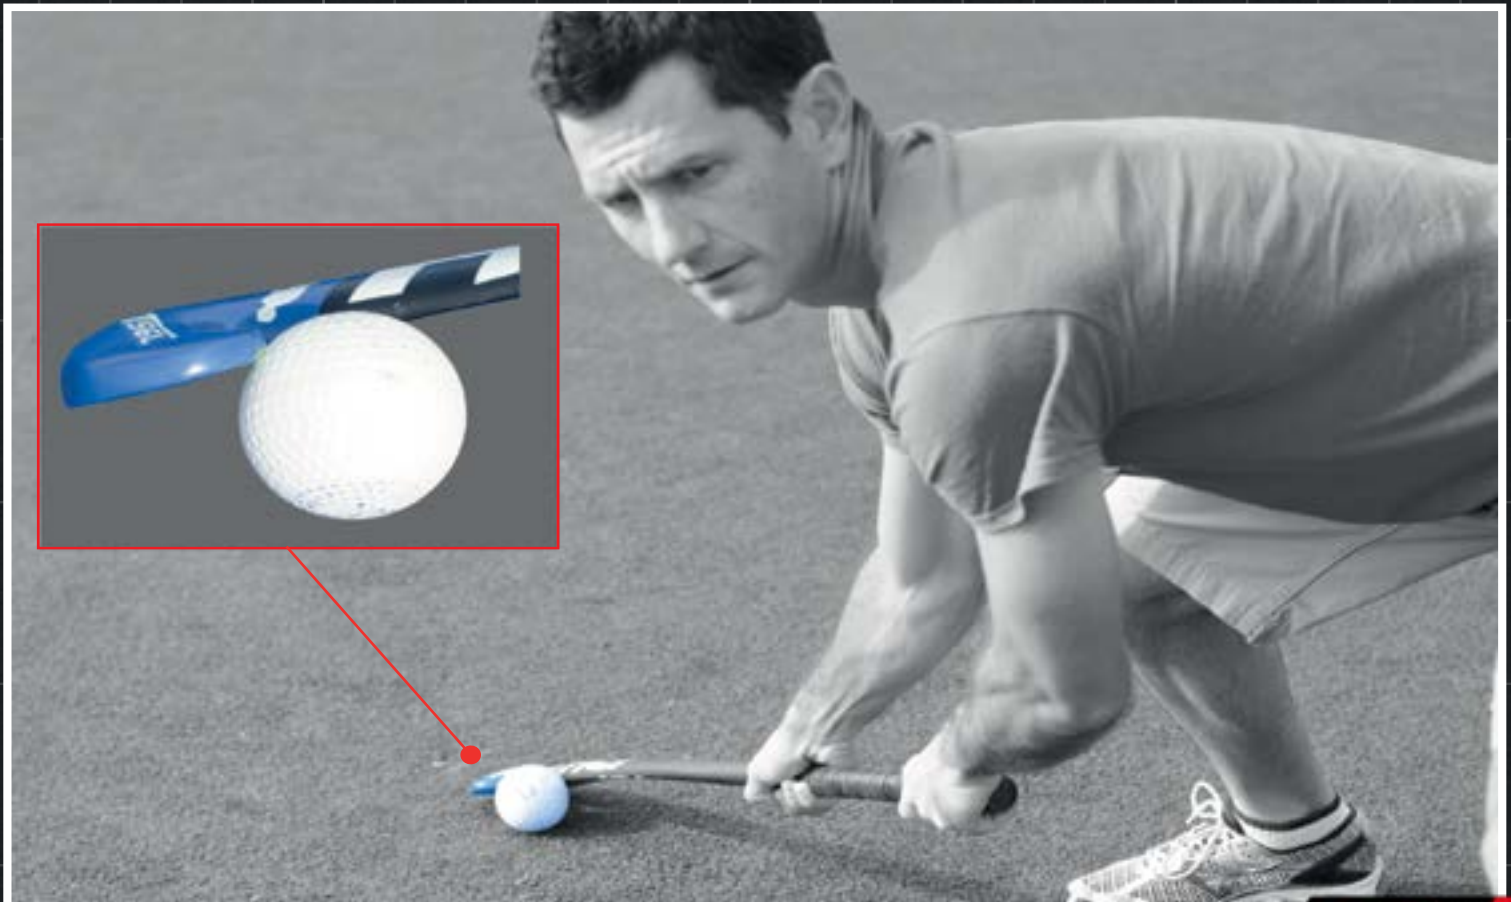

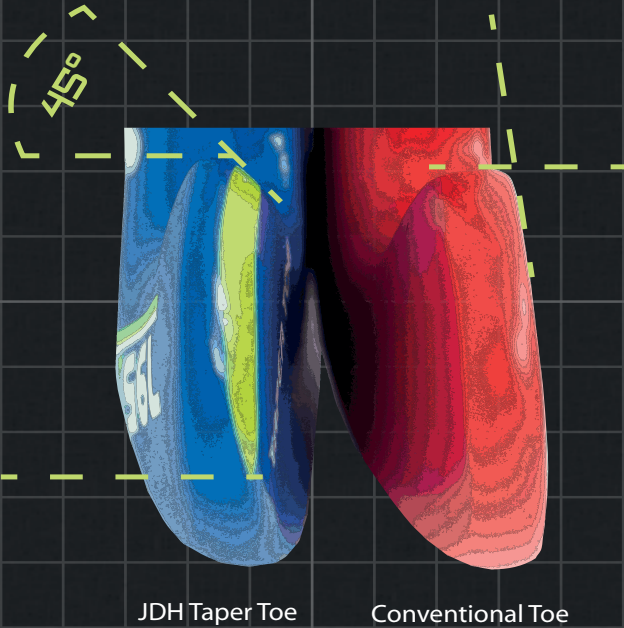

## FEEL THE CONTROL

Specifically designed 45 Degree  
Tapered Toe offering.....

- More control on Fore-Stick Drags
- Better precision on Push outs
- Faster on the spot spins
- Overall Better Ball Control

"For my whole international career I have  
always shaved down the toe of my stick for  
the above benefits... Now I am lucky enough to  
incorporate it into my own designs."

XLB

Stemming from years of experience at the highest level possible and an incredible amount of knowledge, the APX795 has been specifically designed by Jamie Dwyer.

The APX795 provides the optimum balance of Power and Ball Control with it's superior construction of ultra premium composite materials and a custom layup chosen personally by Jamie Dwyer.

It features a Nano Tech Resin System which significantly improves the overall strength by adding nano particles into the resin mix which also helps maintain a soft touch feel.

HOOK HEAD

NANO TECH RESIN SYSTEM

KEVLAR ARAMIDE REINFORCED HEAD

TEXTURED FINISH FACE FOR EXTRA CONTROL

CHUBBY GRIP FOR INCREASED SHOCK RESISTANCE

Both the APX795 and APX750 feature the newly designed Hook Head. The new hook stems from the large amount of International Players who use a hook head as it helps provide better ball control, strong back-stick trapping, improved stick skills and gives you a stonger feel over the ball!

# APX 750

AVAILABLE IN 3 MOULDS

SB

LB

XLB

The APX750 is a new introduction to the 2014 line up.

Sharing many of the elite features of the APX795 this stick is set to be a hugely popular stick for players who are quickly progressing up the ranks.

It features our Nano Tech Resin System which significantly improves the overall strength by adding nano particles into the resin mix which also helps maintain a soft touch feel.

It's power to weight ratio is something that has to be felt!

Featuring a stealth design which has to be seen to be truly appreciated.
